GRYPHONFLEX

Hydraulic Conveyance System

Gryphon Flex

XTREME

Hose, Fittings & Adaptors

The GryphonFlex series is a cost-effective hydraulic conveyance system consisting of hose, fittings and adaptors that are engineered, tested and verified to work together to provide excellent performance and reliability across a wide range of uses and applications.

RELIABLE
SYSTEM-MATCHED
PERFORMANCE

Engineered and assembled in Canada
GryphonFlex meets SAE standards for
operating pressure, temperature, abrasion
resistance and impulse cycle life.

Flagship GryphonFlex **XTREME** meets or **exceeds**
SAE standards for pressure, temperature, and
abrasion while offering **million impulse cycles** -
for your lowest lifecycle cost option.

SAFETY GUIDE

WARNING

Death, life-changing injury, and destruction of property can result from failure, improper use, or improper selection of hose, tubing, fittings, adaptors, accessories and assemblies.

Possible outcomes include:

- Hose failure and blow out.
- Fluids discharged at high velocity.
- Fittings blown away at high velocity.
- Ignition or explosion of fluid.
- Impact with abruptly descending or moving objects that were held or transported by conveying fluid.
- Dangerously "whipping" hose.
- Electric shock from high-voltage power lines or other electrical sources.
- Flashes or explosions resulting from the accumulation of static electricity.
- Flashes or explosions occurring while applying paint or other flammable liquids.
- Personal contact with conveyed fluids that can be toxic, cold, hot or potentially harmful.

A FLUID INJECTION IS A CRITICAL EMERGENCY

DANGER - FLUID INJECTION

Fluid injection injuries can lead to gangrene, loss of limb, or death.

NEVER CHECK FOR LEAKS BY HAND OR GLOVE

Critical information for Emergency Room doctors:

- Type of fluid
- Pressure of injected fluid
- Amount of fluid injected
- Time between injection and treatment

**DO NOT LEAVE THE HOSPITAL UNTREATED
EVEN IF THERE ARE MINIMAL OUTWARD SIGNS
OF INJURY**

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN, CAN CAUSE DEATH, PERSONAL INJURY AND DESTRUCTION OF PROPERTY.

This document, along with other information provided by GryphonFlex, its affiliated companies, and authorized distributors, offers product or system options for users with technical expertise to investigate further.

The user is entirely responsible for the final selection of the system and its components, ensuring that all performance, endurance, maintenance, safety, and warning requirements for the application are met. The user must thoroughly analyze the application, adhere to relevant industry standards, and consult the product catalog and any additional materials from GryphonFlex or its affiliates or authorized distributors.

If GryphonFlex or its affiliates or authorized distributors offer component or system options based on data or specifications supplied by the user, it is the user's responsibility to ensure that these data and specifications are appropriate and adequate for all intended applications and foreseeable uses of the components.

Offer of Sale

The items described in this document are offered for sale by GryphonFlex, its related companies, or its authorized distributors. The terms of this offer and its acceptance are subject to the provisions outlined herein.

Warranty

GryphonFlex hose, fittings and adaptors are warranted to be free from defects in material or workmanship. This warranty is automatically voided where damage occurs due to improper use, abuse, misuse, inadequate maintenance or failure to follow installation, use and service recommendations.

Hose Shelf Life

The shelf life of rubber materials can be influenced by the storage environment. Quantifying shelf life can be challenging due to the numerous variables affecting the hose. By following proper storage precautions, the shelf life can range from three to five years. However, beyond this period, there may be a notable decline in service life, depending on storage conditions.

Factors that can impact this include:

TEMPERATURE: The hose should be kept in a cool, dry location where the temperature does not exceed 100°F (38°C). If stored in freezing conditions, the hose may need to be warmed before handling, testing, or using it.

EXPOSURE: Avoid direct sunlight, rain, heaters, or placement near electrical equipment.

ENVIRONMENTAL FACTORS: Be mindful of humidity and ozone levels.

CHEMICALS: Keep the hose away from oil, solvents, corrosive materials, or fumes.

PESTS: Protect the hose from insects or rodents.

RADIOACTIVITY: Ensure the storage area is free from radioactivity.

SPACE AND HANDLING: Allow adequate space and avoid sharp bends to prevent damage.

Keep the hose in its original container and avoid stacking it too high, as excessive weight can crush the hoses at the bottom of the stack.

We strongly recommend that hoses in extended storage be visually inspected and tested before use. Hoses that appear to be in marginal condition should be replaced to prevent potential failures, property damage, or personal injury. Store hoses using a first-in/first-out approach. Prolonged storage or poor storage conditions can degrade the hose, reduce its performance, and increase the risk of premature failure.

ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY EXPRESSLY DISCLAIMED. IN NO EVENT WILL GRYPHONFLEX BE LIABLE TO ANY PARTY FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, EXEMPLARY AND INDIRECT DAMAGES, INCLUDING BUT NOT LIMITED TO LOST PROFITS, REGARDLESS OF WHETHER SUCH DAMAGES WERE REASONABLY FORESEEABLE, OR WHETHER GRYPHONFLEX HAD KNOWLEDGE THAT THEY COULD OCCUR.

Premium-tier performance at standard-tier cost

GryphonFlex is a major new line of hydraulic hose and fittings, pneumatic tube, and other conveyance accessories, that are engineered for use in Canadian mobile and industrial applications.

MILLION CYCLES

Premium-tier performance that meets or exceeds SAE specifications, including several with million impulse cycle ratings.

Proven at major OEMs

GryphonFlex has been proven in use by several major OEMs with over half a million feet deployed across a spectrum of demanding applications.

500,000+ FEET SHIPPED

< Equivalent to the distance from Toronto to London, Ontario >

System-matched assurance

GryphonFlex is a complete system, backed by a staff of hydraulic engineers who can provide SolidWorks hose routing solutions and expert assistance with platform design applications.
